

LIFEOS · MOBILE REDESIGN

Quieter, calmer, premium.

A pass over every page that tightens the header to 44px, drops the heavy page titles, replaces shouting buttons with a single coral CTA per screen, and brings glassmorphism back across cards, navs and sheets. Aurora Glass identity preserved — volume turned down.

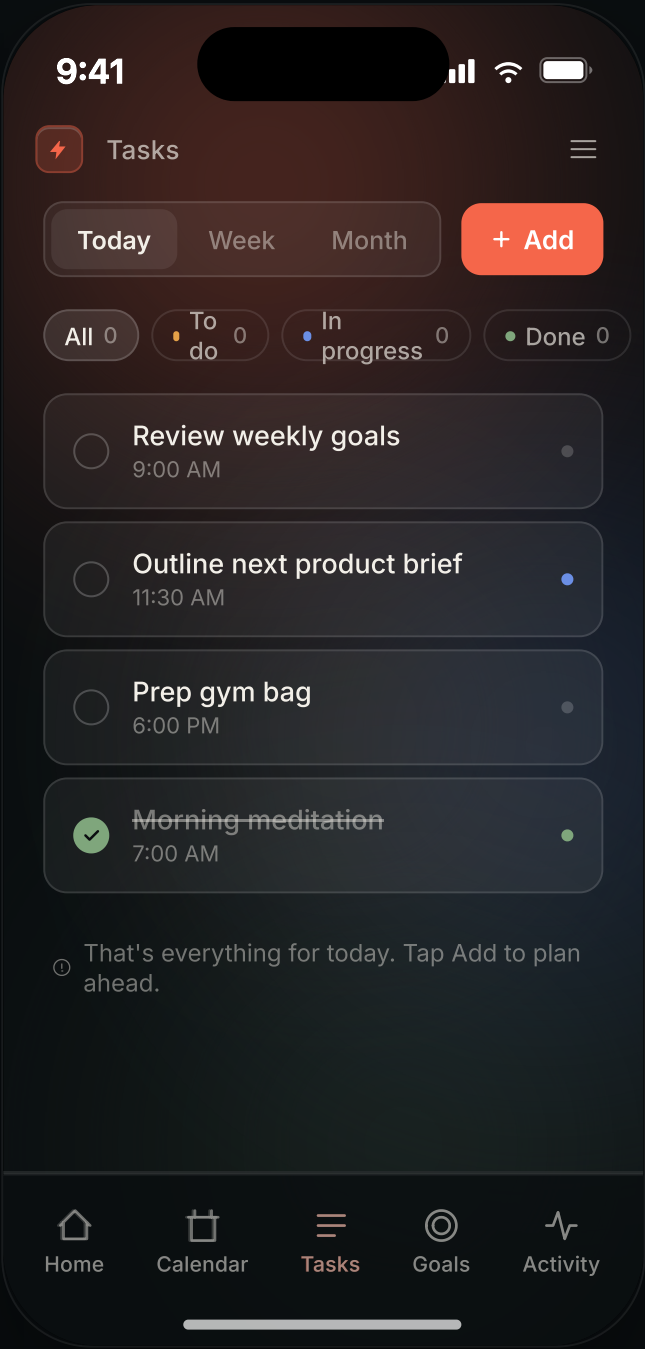

Primary screens

The everyday surface

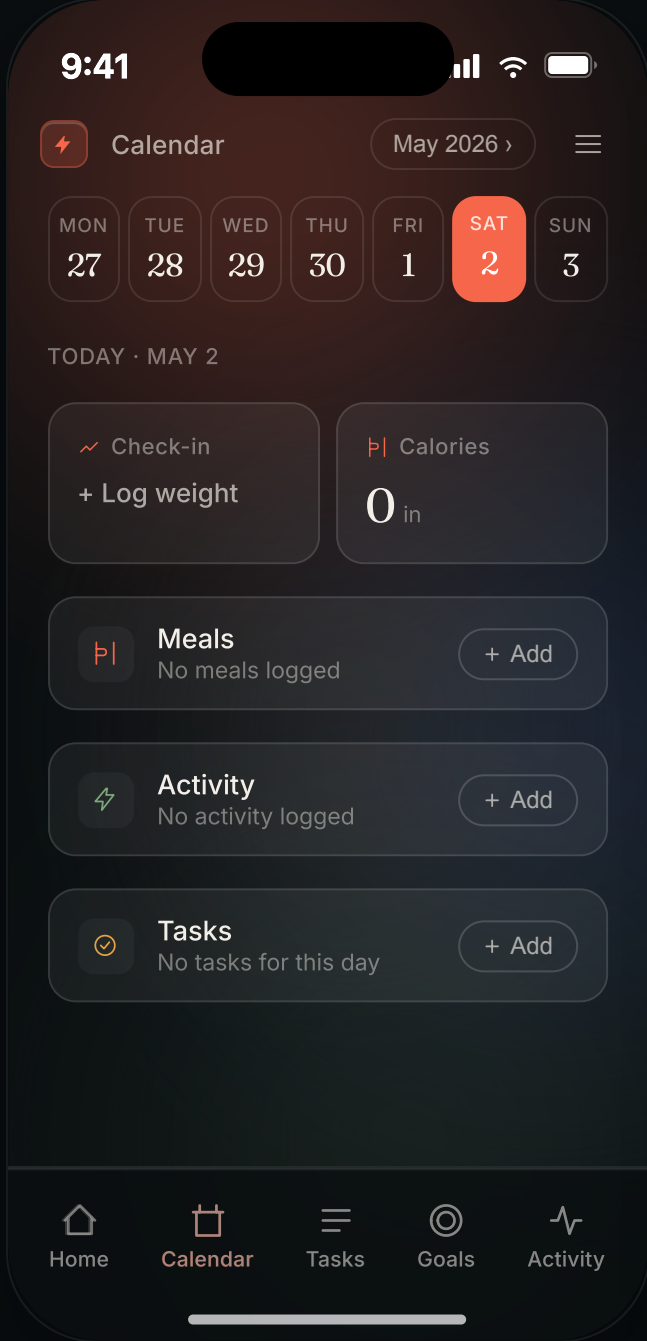

Home

Calorie ring stays hero · 44px header · greeting integrated with date

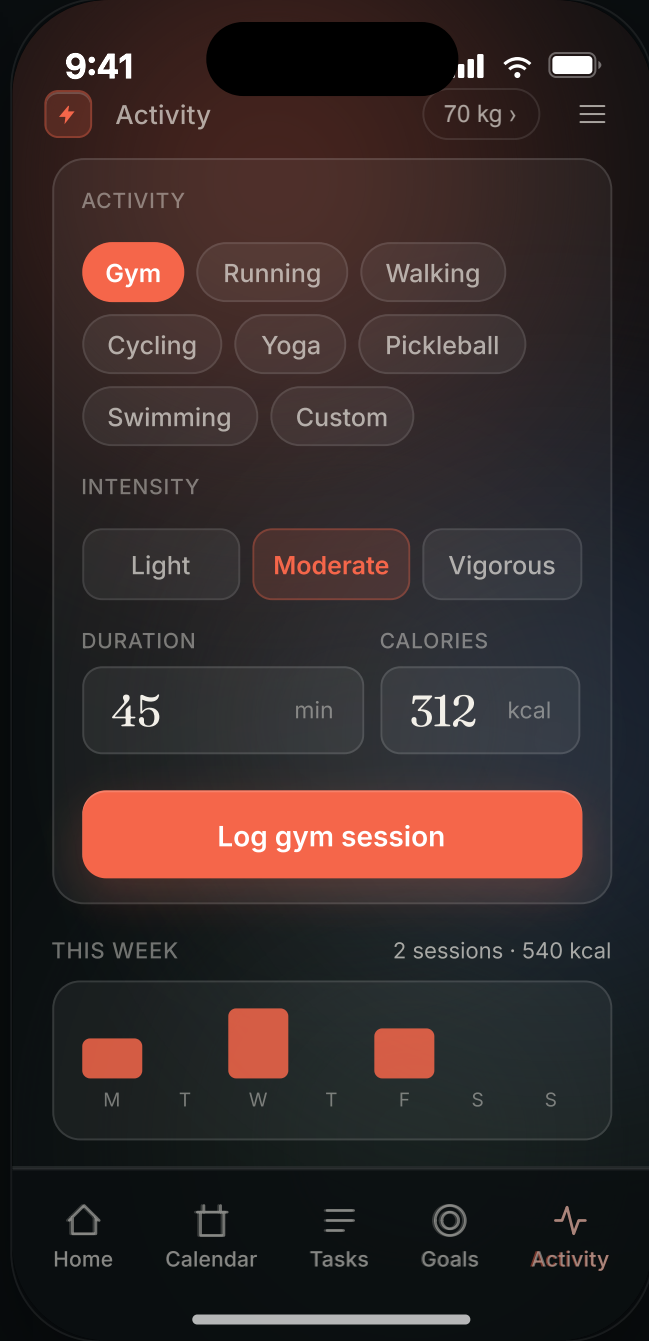

Tasks

Title dropped · filters become the header · inline empty line

Calendar

Compact week strip · snapshot tiles · slim section rows

Activity

Single grouped form · calmer intensity · mini week chart

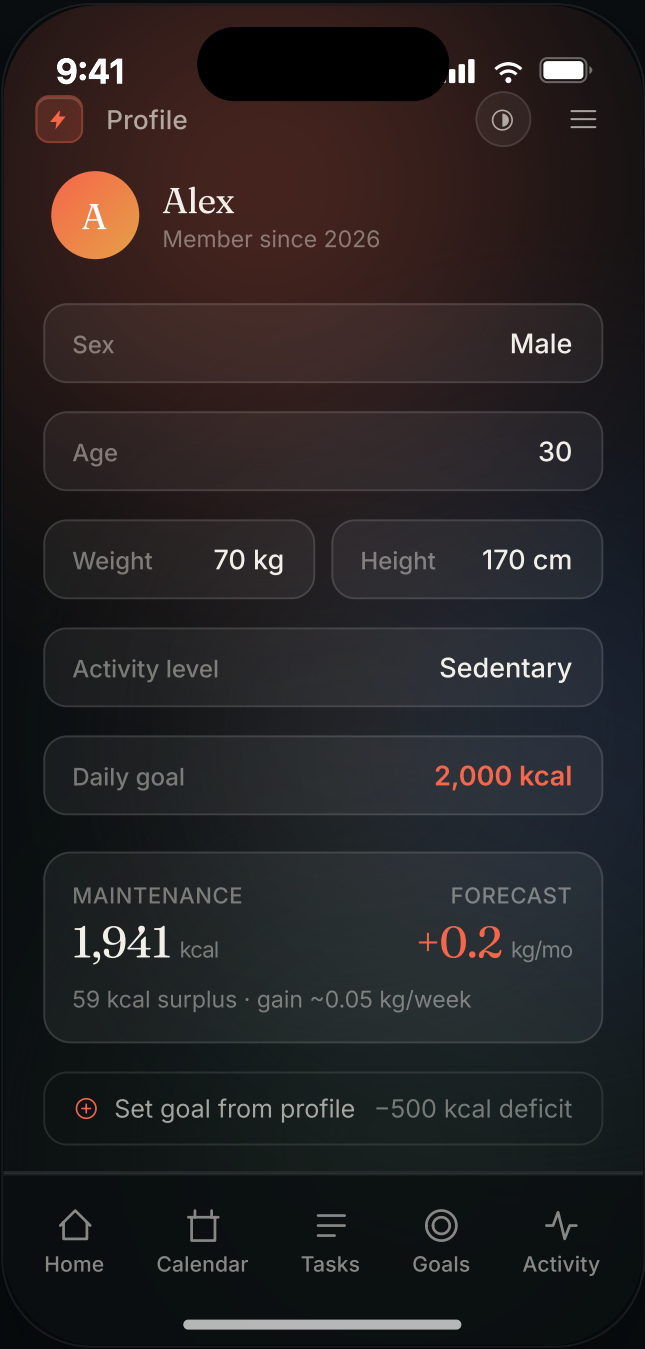

Primary screens (cont.)

The everyday surface

Meals

Quieter day cards · tertiary Add buttons · week scope on top

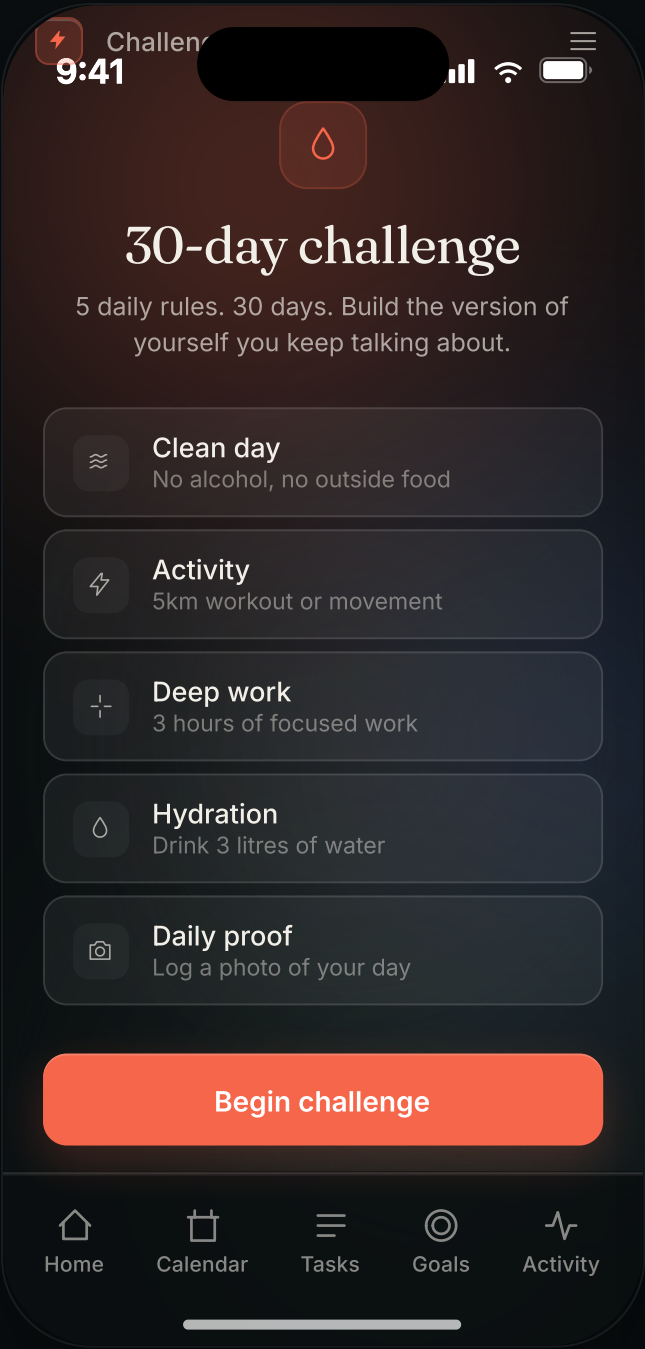

Profile

Identity row · paired form fields · calmer maintenance card

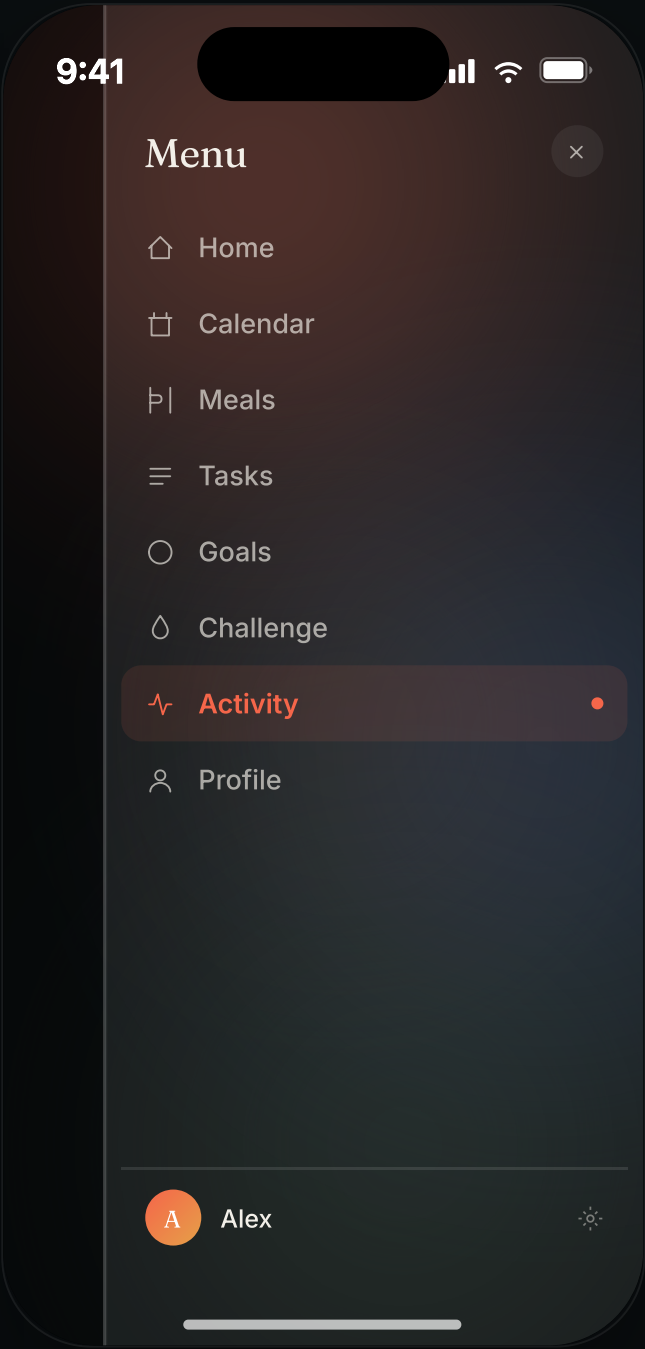

Secondary surfaces

Menu, modal, supporting screens

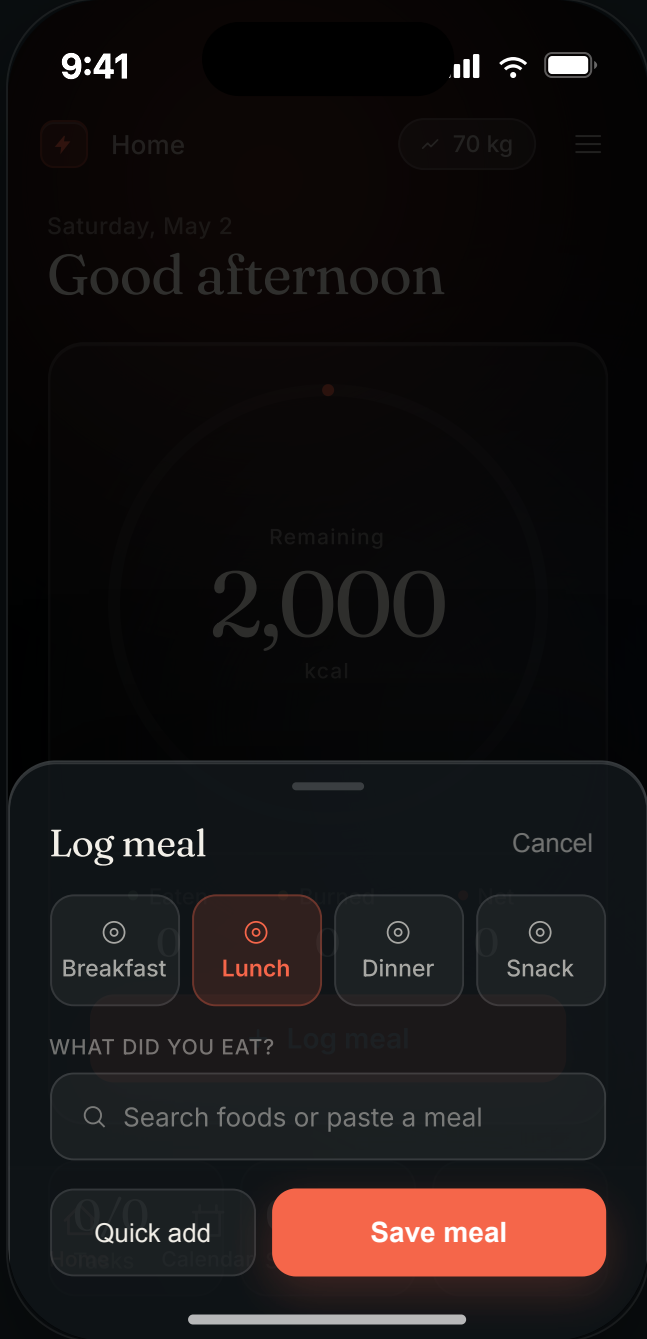

30-day challenge

Smaller flame mark · slim rule rows

Menu

Narrower drawer · lighter weights · quiet active state

Log meal modal

Compact bottom sheet (~50% screen) with grabber
